

October 2013 Release Notes

The following changes were released to the live system during October 2013. Please review the below release notes carefully as some changes impact the way the system works. If you have any questions or need clarification on any of the changes, please contact support at 416-961-7884, option 2, or email us at contact@condocontrolcentral.com.

Related Feature	Change Type	Ref #	Release Notes
Amenity Booking			
	Bug Fix	DEV-475	Sometimes the system would generate reminder emails for bookings that were already canceled.
	Bug Fix	DEV-483	When taking an amenity out of service, if you entered a comment that was too long the change would fail and an error would be displayed. The system now displays a clear validation message stating the maximum allowed comment length.
	Bug Fix	DEV-500	Under certain circumstances when an administrator revised a booking, there is a possibility for the new booking to conflict with an existing booking. This would happen if the new booking completely envelopes the old booking (e.g., starts earlier and ends later).
	Improvement	DEV-481	The wording in the amenity booking email confirmation was not always accurate and clear, depending on the type of booking (e.g., single day vs multiple day). We have added additional email templates so that the wording is now always very clear regardless of the type of booking.
Discussion Forum			
	Bug Fix	DEV-482	Under some circumstances, not all forum moderators were able to moderate posts as they should be able to.
Entire System			
	Customer Request	DEV-456	Condo Control Central now offers the option to have a fully branded website, using your own custom colours and logo. This option is available, at a one-time cost, for security and property management companies who manage multiple buildings on our system. Please contact Condo Control Central Sales for more information.
	Improvement	DEV-498	Owners and residents can now complete the registration process and use Condo Control Central in French. Users can set their language preference during the initial registration process.
Events			
	Improvement	DEV-489	Based on customer feedback, we have added an event durations of up to 8 hours. Available event durations now range from 30 minutes up to 3 weeks.
Lobby Display			

October 2013 Release Notes

The following changes were released to the live system during October 2013. Please review the below release notes carefully as some changes impact the way the system works. If you have any questions or need clarification on any of the changes, please contact support at 416-961-7884, option 2, or email us at contact@condocontrolcentral.com.

Related Feature	Change Type	Ref #	Release Notes
	Improvement	DEV-492	The Lobby Display Feature now allows clients to display multiple images of their property and have them rotate occasionally.
Security & Concierge			
	Customer Request	DEV-490	Incident reports now allow security guards to record the reporter of an incident as well as a suspect (if known).
	Improvement	DEV-474	Based on customer feedback, we have added a disclaimer to the end of the visitor parking permit generated by the system.
	Improvement	DEV-480	Added "Permit Number" to the visitor parking permit report so that each permit can be linked back to the Security Console if needed.
Service Requests			
	Bug Fix	DEV-472	When the system sent email notices about service requests, sometimes it would receive an auto-reply response stating the person is "out of office". In some situations these auto-replies would trigger the request to be closed incorrectly.
