December 2013 Release Notes

CondoControlCentral
The really smart way to run your condo.

The following changes were released to the live system during December 2013. Please review the below release notes carefully as some changes impact the way the system works. If you have any questions or need clarification on any of the changes, please contact support at 416-961-7884, option 2, or email us at contact@condocontrolcentral.com.

Related Feature	Change Type	Ref #	Release Notes
Discussion Forum			
	Customer Request	DEV-478	We've made a change to discussion forums to allow discussion forum moderators to removed posts that have already been approved.
Entire System			
	Improvement	DEV-256	Based on customer feedback, we have added logic to allow hyperlinks to be entered into various parts of the system (e.g., tasks, service requests, etc).
Events			
	Bug Fix	DEV-560	On the "List Events" page, sorting by end time was not working correctly.
File Library			
	Bug Fix	DEV-553	When an owner or resident clicked on an email link for an announcement or file library upload, the resulting page was not formatted properly. The formatting has been improved so that the page is clear and easy to understand.
Public Website			
	Bug Fix	DEV-571	On very large monitors, some client websites' background images would not fill the entire page.
Security & Concierge			
	Bug Fix	DEV-530	Visitor parking now supports "hard" limits on how many permits can be entered for a particular unit in a month. Administrators (such as property managers) have the option to override this limit on a case-by-case basis if they choose to.
	Bug Fix	DEV-575	Under certain circumstances the "New Shift" dialog box would show up emtpy.
	Customer Request	DEV-465	We have added a new setting called, "Visitor parking usage days tracked." This setting changes the number of days displayed in the "Visitor parking usage" text that pops up after you select a unit in the new visitor screen. The default value is 30 days but is editable by customers.
	Customer Request	DEV-524	Previously incident reports were emailed to all administrators (board members & property managers). We have changed the system so that customers can now specify which groups should receive incident report email notifications.
Service Requests			

December 2013 Release Notes

The following changes were released to the live system during December 2013. Please review the below release notes carefully as some changes impact the way the system works. If you have any questions or need clarification on any of the changes, please contact support at 416-961-7884, option 2, or email us at contact@condocontrolcentral.com.

Related Feature	Change Type	Ref #	Release Notes
	Customer Request	DEV-512	We have added a new permission that allows administrators to designate which groups can be assignees for service requests. (Previously it was restricted to either PM or board members). The new solution allows for more flexibility; a user does not need to be an overall administrator in order to work with service requests as an assignee.
Status Certificates			
	Bug Fix	DEV-276	We have added a new email permission for "new status certificate" email notices. This allows administrators to control who receives a notice when a new status certificate is ordered.
Tasks			
	Bug Fix	DEV-544	If a user used advanced formatted options when entering a task update, HTML tags could show up in the board meeting report.
	Bug Fix	DEV-557	Deleting attachments from tasks did not prompt for confirmation before deleting. The system has been changed to add a confirmation step.
	Customer Request	DEV-459	We have added a new email preference that allows for permanent task following. This allows board members to follow updates on a task even if it is reassigned from them to someone else.
Unit File			
	Customer Request	DEV-501	Based on customer feedback, we have made extensive changes to the process for handling move-out of a unit. The new process allows property managers to update all aspects of a unit from a single, convenient screen. The new screen replaces the old one, and is available from "Condo Details > Process Unit Ownership Change".
User Registration			
	Bug Fix	DEV-351	When adding multiple users to a unit at different times, the system would incorrectly change the temporary password, thus causing some new users to not be able to log in.
	Bug Fix	DEV-387	Under certain conditions, the registration site may have allowed duplicate email addresses. Validation has been put in place to prevent this.
