

The following changes were released to the live system on January 31, 2014. Please review the below release notes carefully as some changes impact the way the system works. If you have any questions or need clarification on any of the changes, please contact support at 416-961-7884, option 2, or email us at contact@condocontrolcentral.com.

Related Feature	Change Type	Ref #	Release Notes
Amenity Booking			
	Bug Fix	DEV-581	When booking an amenity on a computer with a small screen, the next step in the booking process may not be visible after you click "Next". To fix this, the system will now scroll to the top of the page when you move between steps to ensure the next step is always visible.
	Bug Fix	DEV-585	While booking an amenity, the "payment details" page had some minor formatting issues for amenities without custom payment instructions.
	Bug Fix	DEV-601	When booking an amenity where the start time has already passed, the system would sometimes incorrectly show a message saying "the amenity has a lead time of 0 minutes". This has been fixed.
	Customer Request	DEV-572	When revising an amenity booking as an administrator, you can now edit the comments attached to the booking.
Security & Concierge			
	Bug Fix	DEV-554	When saving a new security log or incident report in Firefox, sometimes the user would be required to click "Save" twice for the click to be registered.
	Bug Fix	DEV-588	When creating a new authorization, leaving the "authorized by" field blank would cause an error.
	Bug Fix	DEV-600	In the March release of Condo Control Central, the "package" icon will be released from the android application. In this release, we have added text explaining the preferred way to release packages using the system.
	Customer Request	DEV-548	Based on customer feedback, the system will no longer prompt for a signature when registering a visitor.
	Customer Request	DEV-562	Based on customer feedback, we have made a number of changes to the way security guards' daily reports work. First, security guard shift start times are estimated more accurately. Second, the "Relieved" and "Relieved by" fields are now optional to accommodate scenarios where the building does not have 24-hour security. Third, during a shift, the security guard can revise the end time of their shift. Finally, security guards now have a grace period after the end of their shift to ensure they can edit and finalize their daily report.

Related Feature	Change Type	Ref #	Release Notes
	Customer Request	DEV-564	When starting a new shift, security guards are now shown any planned amenity bookings for the day, as well as a summary of any keys that are currently checked out.
Service Requests			
	Bug Fix	DEV-587	When reassigning a service to an assignee who is not a property manager or board member, they would not receive an email notification of the reassignment.
	Bug Fix	DEV-602	Under certain circumstances, when a service request was assigned to a non-administrator they could not view the request. This has been fixed.
	Bug Fix	DEV-610	When running the service request report, the date and time of the latest service request would show up incorrectly.
Unit File			
	Bug Fix	DEV-563	When navigating the unit file, the system would not preserve what page you are on after moving away from the list page.
	Bug Fix	DEV-576	Based on customer feedback, the unit file "Header" information (off-site address, temporary passwords, etc) are now hidden for users who cannot edit the unit file (e.g., typically security guards).
Unit File, Security & Concierge			
	Bug Fix	DEV-580	When editing a vehicle or parking permit, some vehicle makes were not in alphabetical order.
	Bug Fix	DEV-603	When editing a vehicle's details, if you entered a long value for the "colour" field the system would generate an error.
	Customer Request	DEV-565	Based on customer feedback, we have merged the "Units" and "Users" list pages in the unit file so that the information is now shown (and searchable) from a single page. We have also made changes to improve search speed on this page.
User Registration			
	Bug Fix	DEV-569	Under certain conditions, a user may encounter an error while setting their password during the initial registration process.
