CondoControlCentral
The really **smart** way to run your condo.

The following changes were released to the live system on June 23, 2016. Please review the release notes below carefully as some changes impact the way the system works. If you have any questions or need clarification on any of the changes, please contact support at 416-961-7884, option 2, or email us at contact@condocontrolcentral.com.

Related Feature	Change Type	Ref #	Release Notes
Announcement	**Improvement**	**PR-480**	Added the ability to add font colour to announcement details. Administrators can now create announcement with text font and background colour. We have also added the option to preview announcement tv display details on announcement edit page.
Amenity Booking			
	Improvement	**PR-100**	Added the ability for adminstrators to override amenity booking settings when booking an amenity on behalf of a resident. The new permission setting "Amenity Booking > Can Override Any Amenity Restriction" can be added to the administrator group by clicking on "Setup> Groups> Edit Group> Select "Amenity Booking> Can Override Any Amenity Restriction".
Events			
	Improvement	DEV-1339	Added the ability to share events calendar among different workspaces. Administrators can contact support team to link different events calendars. We have also added the option to not send emails when creating or updating events. Administrators can click on the option to send emails when they want to notify the residents about an event.
File Library	Issue	DEV- 1458	Addressed an issue with File library upload size error. This issue occurred when an administrator uploaded a document excceding the file size set on library.
Maintenance			
	Issue	DEV -1456	Addressed an issue with Maintenance file attachment. This issue occurred when an administrator uploaded an attachment with more than 50 characters in the name.
Reporting			
	Issue	PR-60	Addressed an issue with Amenity Booking usage report when amenities are linked with each other. This issue occurred when an amenity is blocked from booking shown as booked on the report because of its linkage with another amenity.
	Improvement	PR- 456	Added the ability to generate "Incident Report Activity Summary" report. Administrators can now generate a report that summarizes the incident reports created for the condo. The report provides important information about report types, number of reports opened by month, types of new reports by month, number of reports still open by month and average age of closed reports.
	Improvement	PR- 456	Added the ability to generate "Incident Report Portfolio" report. Administrators can now generate a report that summarizes the incident reports created according to the properties they manage. The report provides important information about reports by property, number of new reports opened by month for the portfolio, types of new reports by month per property, number of reports still open by month and average age of closed reports.
	Improvement	PR-499	Added the ability to generate "Service Request Summary" report with start date and end date. Administrators can now filter the report with request type, request status, request assigned to, service request create and end date.
Service Request	Issue	DEV-1440	Addressed an issue with Service Request "Permission To Enter" option. The issue occurred in certain situations where the service request details for permission to enter didn't get updated on service request update page.
	Issue	DEV -1453	Addressed an issue with Service Request for users who had no email or username associated to their account. This issue occurred when service request was assigned to users without any contact information in the system.
	Improvement	PR-481	Added the ability to print a service request. Users can now print a service request from the service request details page. Upon clicking print, a pdf version of the service request will be downloaded.

Security & Concierge			
	Issue	DEV-1455	Addressed an issue with the Package details page which resulted in an error when a user clicked on "release package" in certain situations.
	Issue	DEV-1421	Addressed an issue with the Key Check-In feature. This issue occurred in certain situations when the security checked out the same key multiple times by clicking save option repeatedly.
	Improvement	PR-291	Added the ability to set visitor parking fixed permit length. Administrators can change the visitor parking settings to allow users to create a visitor parking with a 24 hour/ 12 hour expiration time.
	Improvements	PR-466	Added the ability to set the default license plate province or state for visitor parking permits when issuing a parking permit. To activate the feature for your workspace, click on Setup > Security & Concierge > Visitor Parking Settings > Default Province/State. For workspaces in USA, you will have to change the Country on Setup > Workspace Settings > Country.
Store			
	Improvement	PR-458	Added the ability for administrators to sell any items to the residents. Our new "Store" feature provides an easy platform for residents to purchase any items sold by the corporation or management using credit card. The store feature uses our Stripe integration to process credit card payment. Please contact support for more information about how to create a stripe account.
Training			
	Issue	DEV-1439	Addressed an issue with certificates in the Training Module. This issue occurred in certain situations where the users completed the learning path and the option to generate the certificate was missing.
Unit File			
	Issue	DEV-1454	Addressed an issue when adding a file with a name longer than 50 characters on the unit file. This issue occurred when administrators added an attachment to the unit file with a long name.
	Improvement	PR-500	Added the ability to create/update common element details with either the "Legal" or "Common" description. Earlier legal description was a mandatory field. Now administrators can create a new common element with either the common or legal decription as required information.
	Improvement	PR-501	Added the ability to generate welcome letters for "Resident" group in the condo. Now administrators can provide "Resident" group members with Registration codes. Automated emails will be send to the user when a new account is added to the resident groups in the system.
