February 1, 2018 Release Notes

The following changes were released to the live system on February 1, 2018. Please review the release notes below carefully as some changes impact the way the system works. If you have any questions or need clarification on any of the changes, please contact support at 416-961-7884, option 2, or email us at contact@condocontrolcentral.com.

Related Feature	Change Type	Ref #	Release Notes
Amenity Booking	Issue	DEV- 1816	Addressed an issue with amenity booking view popup not displaying resident phone number when a note is attached to the phone number.
Proxy	Improvement	PR-706	We've updated our Proxy functionality to support the new Ontario specific proxy form. This update will allow administrators to collect proxies using the new form. As part of the change, we have introduced a new functionality that will allow residents to RSVP to the meeting without having to create a proxy.
Reporting	Improvement	DEV-1838	Migrated the Service request Activity summary report from the old reporting functionality to the newer version.
Registration	Improvement	PR-699	Introducing the new self-registration process which allows residents to update their contact details, emergency contacts, Unit details, Vehicle, Keys, remotes and pets. Residents can now sign all the registration documents online including Electronic consent for receiving legal documents. As part of the change, we also introduced photo id capturing options for the registration. Administrators can easily configure the view settings for the registration under the setup page> welcome site settings.
Security and Concierge	Issue	DEV-1852	Addressed an issue with key checkout signature capturing issue when multiple keys are checked out. This issue occurred after the user signed on the topaz signature pad and the view page didn't clearly show the signature.
Service request	Issue	DEV-1818	Addressed an issue with Service request list page filter option. This issue occurred when administrators used the filter to view the closed service request.
Status Certificate	Issue	DEV-1819	Addressed an issue with Status certificate email delivery notification. This issue occurred when the user clicked on the email notification link to the status certificate tracking page and it resulted in an error message.
Two Factor Authentication	Issue	DEV-1840	Addressed an issue with Two-factor authentication for the user who changes their phone numbers when the functionality is activated. This issue was experienced by users who activated 2FA and removed their phone number. In situations where the phone number is removed from the user, 2FA authentication will automatically be turned off for those users.
