

The following changes were released to the live system on October 1, 2018. Please review the release notes below carefully as some changes impact the way the system works. If you have any questions or need clarification on any of the changes, please contact support at 416-961-7884, option 2, or email us at contact@condocontrolcentral.com.

Related Feature	Change Type	Ref #	Release Notes
Classified ads	Issue	DEV-2068	Addressed an issue with editing classified ads after the moderator approval. This issue happened in workspaces where moderation for classified ads was turned on. Residents will no longer have the option to edit a post already approved by the moderators.
Electronic Consent	Issue	DEV-2065	Addressed an issue with Electronic consent document page during proxy creation. Some users had issues while creating an electronic consent document on Internet Explorer.
Print job	Issue	DEV-1972	Added the ability to send print materials to our printing partner using announcement and proxy feature. We introduced a new feature called "Print Jobs" that allows administrators to send print materials to our partner printer, "Cats Media". Administrators will see new options while creating Announcements and Proxy. Users will see the print options available during the creation process and can check the cost of the print before submitting the order. This feature is rolled out to all our Canadian clients.
Unit File	Issue	DEV-2085	Addressed an issue with maximum character limit for lease amount. Administrators can now create leases with over \$1,000,0000 value.
Registration	Issue	DEV-1988	As part of this release, all users with registration codes will now be directed to the new registration site. Users with old codes can still use them on the new registration page. Going forward users will only have access to the new registration system for account setup.
Security & Concierge	Issue	DEV-1888	Added the ability to update the package spot after a package is created. The user can now click on the package details and change the location by adding the new location information or selecting from the drop-down menu.
Security & Concierge	Issue	DEV-2066	Addressed an issue with Topaz signature pad saving signatures. This issue affected some users when they tried to save the signature for a released package or key.
Setup	Issue	DEV-2072	Addressed an issue with welcome letter generation for users who belong to the tenant and resident group. This issue happened when administrators generated welcome letters by selecting "all groups" on the welcome site setting page.
Status certificate	Issue	DEV-2088	Addressed an issue with status certificate fulfilled emails to users when the workspace login is disabled. Going forward our system will not check if the workspace owner login is enabled or disabled. The email confirmation and fulfilment email will be sent to the creator of the order.
