Condo Control Central
January 29, 2019 Release Notes

The following changes were released to the live system on January 29, 2019. Please review the release notes below carefully as some changes impact the way the system works. If you have any questions or need clarification on any of the changes, please contact support at 416-961-7884, option 2, or email us at contact@condocontrolcentral.com.

Related Feature	Change Type	Ref #	Release Notes
Phone book	Issue	PR-702	Based on the feedback from clients, we have redesigned our phone book feature. Administrators can now turn on Phone book feature on the setup page under the workspace settings> registration section. When the feature is turned on, residents will see the option to opt in or out of the resident phone book feature.
Service Request	Issue	DEV-2230	Addressed an issue with service request update section where the resident updates were not properly saved as a public comment. This issue happened when multiple users in the unit updated the service request using the desktop web app.
Security & Concierge	Issue	DEV-2213	Addressed an issue with releasing multiple packages at the same time. This issue occurred when multiple packages were released at the same time and the package delivered record on the security console was not visible to the guard who released the package.
Survey	Improvement	PR-490	Based on the feedback from clients, we have redesigned our survey feature. As part of the overhaul, we now support survey responses without having the resident login to CCC. The email template and the survey creation process have also been updated as part of this change.
Home page redesign	Improvement	PR-374	As part of our recent update to the home page, we now moved the logo and colour configuration to the setup section. Administrators can now configure the colour and logo for a workspace on the setup page> Dashboard settings.
